DELEGATION OF WALLONIA

AGRONUTS

Growers of quality, artisan softaste

Rue de la Levée , 306
5070 SART-SAINT-LAURENT
Belgium

www.agronuts.be

Sectors of activity *Agriculture - Horticulture - Forestry - Breeding, Agri-food*

About the company

At Agronuts, we combine agronomy and craftsmanship to serve B2B partners across Europe. We produce certified hazelnut plants in Cherasco, Piedmont, under the guidance of a grower with over 40 years of experience, and process traceable hazelnuts in Fosses-la-Ville, Belgium, into premium ingredients for food professionals

Products & services

Certified hazelnut plants

Our plants are grown in a photovoltaic greenhouse to promote strong roots and faster establishment. We offer licensed OSU varieties, including Tonda Pacifica, Yamhill and McDonald, alongside leading Italian cultivars. All plants come with a CE plant passport ensuring varietal authenticity and plant health with no hazelnut plants or nuts sourced from Turkey.
Bare-root plants | OSU and Italian varieties | European delivery

Services

We support hazelnut projects from planning to first harvest, providing:

- Site and soil assessment
- Orchard design and economic planning
- Variety selection based on intended use
- Planting support and technical follow-up, including pruning, fertilization and plant health advice

Our products

Processed in Fosses-la-Ville, our range includes:

- Hazelnuts in shell and shelled
- Roasted hazelnuts
- Pure hazelnut paste
- Hazelnut praline (50/50 and 60/40)
- Caramelized hazelnuts

Made for chocolatiers, pastry chefs and ice cream makers, our products combine traceability, consistent quality and a commitment to a local, sustainable supply chain.

BELGIAN ADVANCED TECHNOLOGY SYSTEMS

Drivento Protect.
Allee des Noisetiers, 8
4031 ANGLEUR
Belgium

www.bats.be

Sectors of activity

Industries, Infrastructure - Works, ICT, Defense - Security

About the company

BATS develops and supplies advanced technology solutions for Defence and Homeland Security, including battlefield, infrastructure, border and coastal surveillance. Founded in 1984 in Liège Science Park, we are a long-standing supplier to the Belgian Army and an approved supplier to NATO and the European Commission. Our integrated solutions combine radars, electro-optics, COMINT and other sensors, supported by system analysis, assembly, maintenance and integrated logistics support (ILS).

Products & services

AIR DEFENSE RADAR

BATS provides advanced AESA radar systems for early warning, detection and tracking, supporting fire control, surveillance and C-RAM missions. Solutions range from mobile tactical radars to compact multi-mission and aerostat-borne long-range systems, integrating with COMINT/ELINT, IFF and EO/IR sensors for secure situational awareness.
TMMR-38: Tactical GBAD and C-RAM radar | TMMR-11: Compact multi-mission radar |TMMR-83: Aerostat-borne early-warning radar

C-RAM

Our AESA-based C-RAM systems detect and track incoming rockets, artillery and mortars, calculate launch and impact points, and support counter-fire operations. Scalable configurations provide rapid response for mobile and stationary forces, with secure command-and-control (C2) integration.
TMMR-11 with artillery weapon-location mode | TMMR-38 for GBAD and C-RAM | Secure sensor-to-shooter C2 interfaces

CUAS

BATS provides fixed and on-the-move CUAS solutions combining radar, EO/IR and effectors for drone detection, tracking and mitigation. Its modular systems support 360° coverage and are fielded by the U.S. DoD and DHS.
Drone Guard: modular radar, EO/IR and jammer, 360° | OTM: convoy-speed CUAS with phased-array panels | Proven in NATO c-UAS exercise scenarios

Homeland Security

BATS protects borders, critical infrastructure and public spaces through 24/7 surveillance, real-time situational awareness and integrated active and passive sensors.
GR-80: Multi-mode ground surveillance radar
Res-Q-Cell: Cellular geo-location for search and rescue
ComDart: Compact V/UHF 3D RF location
ECM/EW: Electronic countermeasure and warfare solutions across air, land and sea

Vehicle Protection Systems

BATS enhances crew survivability with electro-optical sensors and 360° tactical radars that detect hostile fire, missiles, rockets, small arms and UAS, enabling rapid countermeasures and tactical response.
OTHELLO: Optical threat locator
TMMR-35: Multi-mission radar for ground combat vehicles
Standalone or integrated with remote-controlled weapon stations (RCWS) and protection suites

DALEMANS

European manufacturer of intelligent gas detection for buildings and industry

Rue Jules Melotte, 27
4350 REMICOURT
Belgium

www.dalemans.com/fr/

DALEMANS
GAS DETECTION

Sectors of activity

Business Services, Chemicals, Defense - Security

About the company

We design and manufacture professional gas detection systems for HVAC, car parks, laboratories and industry. Combining in-house R&D, European production and field services, we provide complete solutions, from technical studies and commissioning to maintenance. Our range includes control panels, addressable and analog detectors, accessories and gas installation equipment, compliant with European standards such as EN 50545-1 and ATEX where applicable.

Products & services

Accessories for gas alarm control panels

We offer compatible gas detection accessories that ensure system reliability and visibility, enabling clear alarms, safe shutdowns and reliable power in car parks, laboratories and industrial environments.

Batteries and battery packs | Sirens, buzzers and flashing beacons | Emergency stop and manual reset units | LED signage for car parks and detector cones

Equipment for Gas Installations

We complement detection systems with a wide range of gas installation equipment that enables safe isolation, precise regulation and clear metering of gas networks in industry and laboratories.

Solenoid and manual valves, thermal protection valves | Regulators, filters, pressure gauges | Gas meters and external gas boxes

Gas detection control panels

Our control panels provide reliable gas monitoring, fast alarm management and regulatory compliance, from small boiler rooms to complex facilities. Compatible with D•CAN Gen2, D•420, DAT 420, DAX 420 and D•TEX 420 detectors, our range includes:

S•Vx: Car parks (EN 50545-1)
S•Lx: Laboratories (EN 62990-1)
U•V6, U•H1/U•H6, U•C2: Toxic, explosive and refrigerant gases
OCTOBUS64 and OCTOPLUS: Large multi-zone systems

Gas detectors

Our detectors monitor toxic, explosive and asphyxiating gases with robust IP65 housings and proven sensing technologies. The range covers **addressable CAN-bus** and **analog 4–20 mA** outputs for integration with our control panels.

- **D•CAN Gen2** addressable with multicolor status LED.
- **D•420** CO, CO_2, NO_2, NH_3, O_2 and more.
- **DAT 420** ATEX toxic gas and O_2.
- **DAX 420** explosive gases for hazardous areas.
- **D•TEX 420** explosive gases, ATEX Cat. 3G.

Co-Engineering: Our in-house R&D team develops customized gas detection hardware and software, supporting projects from design to validation to meet specific safety and operational needs.

Maintenance: We ensure safe, compliant and reliable operation through system checks, calibration, certified-gas adjustments, documented reports and flexible service contracts for multi-brand installations.

ECOSTERYL

Medical waste treatment andrecycling
Avenue Nicolas Copernic, 1
7000 MONS
Belgium

www.ecosteryl.com

Sectors of activity **Industries**

About the company

We develop and manufacture innovative solutions for infectious medical waste treatment using 100% electric microwave and dry-heat technology, enabling disinfection and potential recycling. With over 220 installations in 65 countries across five continents, we serve hospitals and institutions worldwide. B Corp certified and recognized by organizations including the WHO, World Bank and United Nations, we combine proven technology with reliable support and sustainable waste management.

Products & services

Ecosteryl 75

Compact, 100% electric system using dry-heat microwave technology. Capacity: 75–100 kg/h (0.25–1.5 t/day); disinfection: ≥ 6 $\log_{10}$. Dry, sortable output for R-Steryl recovery. ~20 kWh. One operator can manage two machines.

Ecosteryl 75+

100% electric medical waste disinfection with automated container loading. Capacity: 75–100 kg/h (0.25–1.5 t/day); disinfection: ≥6 $\log_{10}$. Dry, sortable output for R-Steryl recovery. ~22 kWh. Optional Wi-Fi/5G monitoring.

Ecosteryl 125

Continuous, 100% electric treatment for medium to large hospitals and service providers. Capacity: 125–175 kg/h (1–3.5 t/day); disinfection: ≥6 $\log_{10}$. Four-shaft shredder with anti-blocking system. ~45 kWh.

Ecosteryl 250

Bestseller for high-throughput professional operators. Capacity: 250–300 kg/h (2–7 t/day); disinfection: ≥6 $\log_{10}$. Dry, sortable output for R-Steryl recovery. ~60 kWh.

Ecosteryl 500

100% electric, continuous system designed for high-capacity, 24/7 operation. Capacity: 500 kg/h (4–12 t/day); disinfection: ≥ 6 $\log_{10}$. Dry, sortable output for R-Steryl recovery. ~80 kWh.
Ecosteryl 125, 250 and 500: Optional remote monitoring, online reports and R-Steryl integration. Installation, commissioning and on-site training available.

R-Steryl

Automatic sorting center for disinfected medical waste, separating recoverable materials by size and color to support recycling and generate revenue. Capacity: 1.5 t/h; average consumption: ~25 kWh. Dimensions: 11.5 × 3 × 5.3 m; recommended space: 17.5 × 9 m, height 6.5 m. One operator can manage one Ecosteryl and one R-Steryl.

IEM POWER SYSTEMS

PowerQuality SolutionsforCriticalUsers
Cour Lemaire, 16
4651 BATTICE
Belgium

www.iemps.com/

Sectors of activity **Business Services, Energy**

About the company

IEM Power Systems designs and builds electrical power systems worldwide, including turnkey solutions, Rotary UPS and Rotary Power Conditioners. As a subsidiary of Industrial Electric Mfg. (IEM), North America's largest independent full-line manufacturer of electrical distribution and power quality equipment, it combines U.S. and European engineering and manufacturing to ensure efficiency and reliability in mission-critical environments.

Products & services

RBT - Rotary UPS Rotabloc® RBT

RBT provides battery-free power protection with low maintenance and a design life exceeding **25 years.** Available in low or medium voltage, it ensures voltage conditioning and protection against power failures. Modular paralleling enables scalable redundancy for critical facilities.

Configuration

RBT and RBQ operate in low or medium voltage, with parallel configurations, scalable redundancy and turnkey solutions tailored to your site, budget and targets.

- Parallel operation for capacity and N+X resilience
- Scalable design for easy expansion
- Tailored project engineering and delivery

Integration

Rotabloc is easy to install and requires no batteries, produces no hazardous gas and presents no fire or explosion risk. Containerized solutions reduce installation time and space requirements.

- Real-time monitoring
- Factory build, integration and testing

Service

Rotabloc offers high efficiency, reliability and low maintenance. Services include factory testing, commissioning, technical training and **24/7 support**. Automatic lubrication and globally available standard spare parts simplify maintenance.

- Factory integration tests
- On-site testing and start-up
- Warranty, upgrades and global support

RBQ – Rotary Power Conditioner Rotabloc®

RBQ protects industrial processes by filtering **99% of power disturbances**, including voltage dips, spikes, harmonics and flicker. With no batteries or fragile electronics in critical functions, it offers low maintenance and long service life. Available in low and medium voltage, from **1.2 MVA** to multi-megawatt solutions.

- High efficiency and green technology
- Modular "Plug & Run" paralleling
- Total failure protection when paired with generators

ION BEAM APPLICATIONS

Protect, Enhanceand SaveLives
Chemin du Cyclotron, 3
1348 LOUVAIN-LA-NEUVE
Belgium

www.iba-worldwide.com

Sectors of activity **Life Science - Medical**

About the company

We are the world leader in particle accelerator technology, developing and servicing solutions for cancer diagnosis and treatment, medical device sterilization and industrial applications. Our four core activities are Proton Therapy, Dosimetry, RadioPharma Solutions and Industrial Solutions. With over 2,000 employees worldwide, we deliver precise, reliable and sustainable technologies to protect, enhance and save lives.

Products & services

Proton Therapy

IBA provides end-to-end proton therapy solutions through **Proteus ONE** and **Proteus PLUS**, supporting advanced techniques such as IMPT and image guidance. With 75+ centers sold, IBA offers clinical innovation, upgrades, training and long-term global service.

- Proteus ONE and Proteus PLUS platforms
- Clinical innovations and upgrades
- Global service, training and lifecycle support

Dosimetry

IBA advances radiation therapy and imaging quality assurance through hardware and software, including **myQA**, **myQA Blue Phantom³** and **myQA iON**. The acquisition of Radcal Corporation further expands imaging QA capabilities.

- End-to-end QA hardware and software
- Workflow automation with myQA iON
- Expanded imaging QA through Radcal

RadioPharma Solutions

IBA's **RadioPharma Solutions** deliver cyclotrons, targets, radiochemistry and integrated solutions that make medical isotope production more accessible and efficient. The **Cyclone** family includes the compact **Cyclone KEY** and high-capacity **KIUBE 300**, complemented by **Nirta** targets, **Synthera+** synthesizers and the **Zephiros** control system. We support greenfield and expansion projects with engineering, installation and lifecycle services aligned with GMP practices, enabling production of isotopes such as F-18, Cu-64, Zr-89 and Ga-68.

Industrial Solutions

IBA **Industrial Solutions** provides high-energy **electron beam** and **X-ray** irradiation systems that power sterilization, polymer cross-linking and material enhancement. Our **Rhodotron** and **Dynamitron** accelerators, coupled with turnkey lines such as **Be-Efficient**, **Be-Wide** and **Be Soft**, deliver throughput, energy efficiency and safety. Recent projects include Be-Wide X-ray sterilization in the USA and Be-Efficient e-beam for polymer crosslinking in Germany. Integrated controls like **Beagle** and Building Safety Systems ensure reliable, compliant operations.

L & L PLAQUETTE

Expertise, Unique Creations
Rue d'Hastiere, 26
5560 MESNIL-SAINT-BLAISE
Belgium

www.beurreplaquette.com

Sectors of activity **Agri-food**

About the company

We craft premium churned butter in the Belgian Ardennes, combining six generations of family know-how with pure pasteurized cream and slow churning. Our range includes Sweet, Salted, Fleur de Sel and flavored butters. We serve chefs, hotels and delicatessens with reliable quality, elegant formats and a responsible approach, including eco-friendly parchment paper and partnerships with local sheltered workshops.

Products & services

Flavored Butters

Our flavored butters are a dialogue between the purity of our butter and terroir ingredients. From **Black** and **Alba White Truffle** to **Breton Seaweed**, **Black Garlic** or **Espelette Pepper PDO**, each recipe delivers bold yet balanced character. Designed for professional service, most flavors are available in **250 g rolls**, **100 g tablets**, **10–30 g "butter candies"** and **made-to-order mottes**. They finish dishes beautifully, surprise on cheese boards and elevate the welcome ritual.

Catering

From intimate gatherings to large corporate events, our catering signature elevates every moment. We design **tailor-made creations** that reflect your style, from gourmet canapés to our iconic personalized **"butter candies"**. Why choose us:

- **Passion for taste** in every bite
- **Product quality** through rigorous ingredient selection
- **Custom-made** formats and exclusive creations
- **Controlled project** management and clear proposals

Hospitality Sector

From breakfast to Michelin-starred dinners, our range is designed for professionals. We deliver **consistent quality and unforgettable taste**, service after service, with the practicality your teams need. Choose from **formats tailored to operations**, from **10 g butter candies** to **10 kg blocks**, and a palette of **unique flavors** that inspire menus and define signature dishes. Standard butters provide a pure base, while flavored butters deliver creativity à la carte.

Gourmet Grocery

A gem for your shelves, our butters combine an **authentic story** with **artisan crafting**. Already acclaimed by retailers such as **ROB The Gourmet's Market** and **La Grande Épicerie de Paris**, they reinforce your brand image with elegant, handcrafted packaging and consistent quality. We act as a partner, not just a supplier, providing sales narratives, distinctive flavors and **formats suited to retail**, from 250 g packs to tasting sizes. Build customer loyalty with a product that delights connoisseurs.

Standard butters

Our essential butters express the purity of an exceptional raw material, elevated by our slow-churning expertise. Available in **Unsalted**, **Salted** and **Fleur de Sel**, they deliver a rich creamy taste and a refined, melting texture prized by professionals. Ideal for cooking, sauces and pastry, these butters bring consistency and finesse to every preparation. Crafted from the finest **pasteurized cream**, each recipe is balanced to enhance, never overpower, ingredients. Designed for hospitality and retail alike, they offer dependable quality, elegant presentation and the taste of authentic craftsmanship.

SYNAPHARM INDUSTRIAL SYNTHESIS

Innovative chemical synthesis and patented magnesium for pharma and nutraceuticals

52 Rue de l'Aéroport
4460 GRÂCE-HOLLOGNE
Belgium

synapharm.com

Sectors of activity **Agri-food**

About the company

Synapharm is a pioneer in chemical synthesis for a healthier future, based in Belgium. Its flagship product, ATA Mg®, is an innovative, scientifically proven and bioavailable source of magnesium and taurine that supports overall wellbeing. By acetylating taurine, ATA Mg® improves its ability to cross the blood-brain barrier, increasing magnesium and taurine levels directly in the brain. It helps alleviate mood disorders and promotes calm and relaxation. Clinical studies also show that ATA Mg® significantly relieves premenstrual syndrome (PMS) symptoms.

Products & services

Chemical synthesis process development

We are active in **chemical synthesis process development** that supports our portfolio and our partners in the **food supplements** and **pharmaceutical** industries. Our role is to shape efficient, reliable processes that align with the needs of quality-conscious manufacturers. With a clear focus on industrial applicability, we help transform promising molecules into consistent, market-ready ingredients. Our approach centers on pragmatic execution and deliverables that can be adopted by production environments.

- Application scope: ingredients for supplements and pharma
- Outcome: robust synthesis pathways
- Backed by: hands-on industrial experience

Vitamins and APIs

We **produce and distribute vitamins and various APIs** to the **food supplements** and **pharmaceutical** industries. Our objective is to provide ingredients aligned with professional buyers27 needs across these markets. With a portfolio built for industrial use, we serve formulators and manufacturers seeking dependable supply of core actives.

- Categories: vitamins and APIs
- Industries: supplements and pharma
- Purpose: ingredients for finished products

ATA Mg®

ATA Mg® is our landmark ingredient, a **patented** Magnesium N-Acetyltaurinate. It is an **innovative intra-cell magnesium**, **highly bioavailable** and **scientifically proved**, designed for **brain health** and **women27s health**. ATA Mg® brings unique properties that set it apart within magnesium offerings and is suitable for brands aiming for clear differentiation.

- Form: Magnesium N-Acetyltaurinate
- Status: patented
- Focus areas: brain health and women27s health

TIME2GIVE

Tool watchesfor explorers:Higher, Farther, Deeper since 2011.

Rue des Bergeres, 49
1331 RIXENSART
Belgium

www.gavox.com

Sectors of activity **Fashion**

About the company

Time2Give SPRL manages Gavox Watches, a novel brand founded in 2011 by pilot and engineer Michael Happé. We design and build high-performance timepieces for professionals, inspired by exploration in air, land, and sea. Our collections feature practical functions such as chronograph, 24-hour time, mission timer, multiple time zones, and perpetual calendar. Gavox is official watchmaker to units including the 15th Wing and 350 Squadron, and we have delivered more than 30 custom references to squadrons, officials, clubs, and companies. We sell directly with attentive support and a two-year warranty.

Products & services

Higher

Built for pilots, Higher unites our aviation instruments shaped with professional feedback. Flagship models like the Gavox Aurora bring a unique dual-time system that handles non-standard time zones in 15-minute steps, plus a **fly-back mission timer**, **countdown**, **moon phase** and **perpetual calendar**. Every reference is engineered for fast legibility and robust reliability in the cockpit. Highlights include:

- **Precision quartz or mechanical calibres**
- **High-contrast dials** with clear aviation cues
- **Sapphire crystals** and proven water resistance

Designed by a pilot and worn by squadrons, Higher is a focused toolset for flight, briefing, and travel.

Farther on land

The Gavox Roads series celebrates scenic drives with a Road Book for each route, while Legacy Power Reserve combines vintage military watch design with a power-reserve display. Features include a 12-hour chronograph, tachymeter, alarm, sapphire crystal and stainless-steel cases.

Farther at sea

The Gavox Longitude is a travel GMT with a wave-pattern dial, faceted bracelet and Miyota 9075 movement for independent local-hour adjustment. It features a 24-click bidirectional bezel, Swiss Super-LumiNova, 200 m water resistance and a Kolsterized steel case, also available in DLC “Black Diamond”. Colours include onyx, sapphire and turquoise.

Deeper

The Gavox AviDiver combines diving capabilities with travel utility. It features 20 ATM water resistance, a Miyota 9015 automatic movement, domed sapphire crystal, double anti-reflection and an internal turning bezel.

Armed Forces & Corporate Watches

We specialize in personalized Gavox watches for military forces, police, pilots and corporate professionals. Since 2011, we have delivered 30+ custom references for squadrons, government officials, clubs and companies. Each project is tailored to your requirements, from dials and casebacks to limited editions. Our experience includes multiple air-force squadrons, with pilots wearing Gavox in flight. Discover examples in our GAVOX Catalogue 2024-2025.
